Connect your Chromebook to WiFi

This guide is for personal devices only. Do not connect your college device to eduroam.

1. On your Chromebook, open the Chrome app and go to the website https://cat.edurom.org.

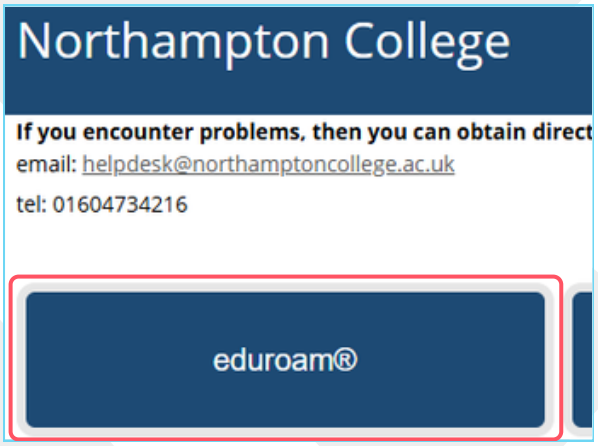

2. On the website, click on the button: **Click here to download your eduroam® installer**.

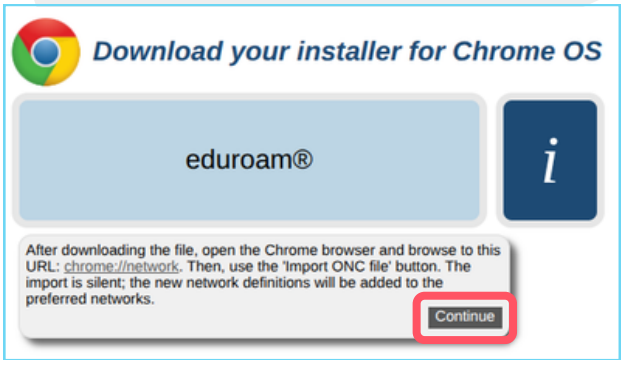

3. In the menu that appears on the right of the page, enter **Northampton College** in the search box at the bottom of the menu, and click on the college from the list.

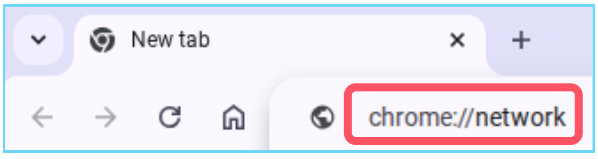

4. Click on the **eduroam®** button.

5. Beneath the eduroam® button click **Continue**.

6. Open a new tab in Chrome and enter **chrome://network** in the address bar at the top of the page.

Connect your Chromebook to WiFi

7 Scroll down the page that loads and click **Choose File** at the bottom of the page.

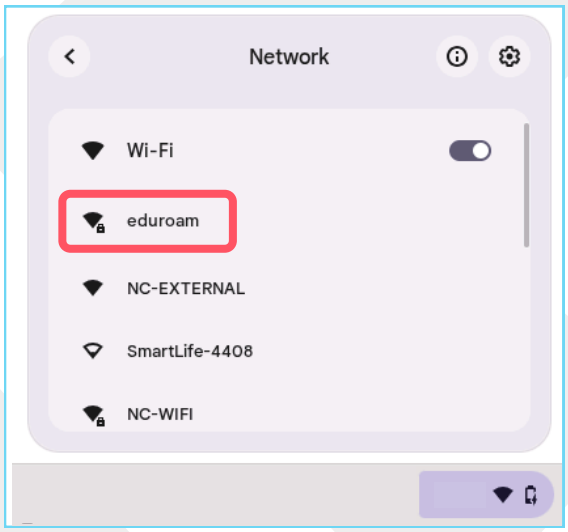

8 In the file window that opens, double click the file **eduroam-chromeos-Student_and_Staff**.

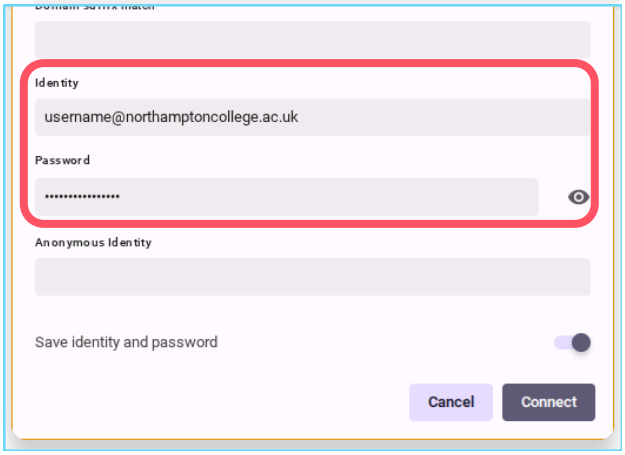

9 In the bottom right of the Chromebook screen, click on the WiFi symbol.

10 In the menu, click the **eduroam** network.

11 In the following pop up scroll down and enter your full college email address into **Identity** and your college password into **Password**.

12 At the bottom of the pop up, click **Connect**. eduroam will now show as connected.
