Connect your Mac to WiFi

This guide is for personal devices only. Do not connect your college device to eduroam.

1. On your Mac, open Safari and go to the website https://cat.edurom.org.

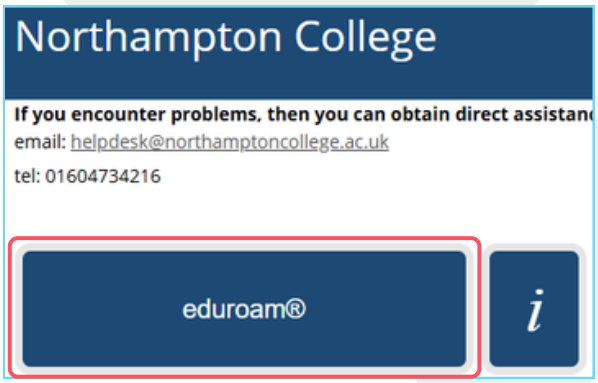

2. On the website, click on the button: **Click here to download your eduroam® installer**.

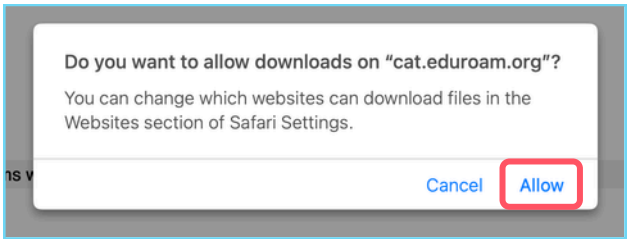

3. In the menu that appears on the right of the page, enter **Northampton College** in the search box at the bottom of the menu, and click on the college from the list.

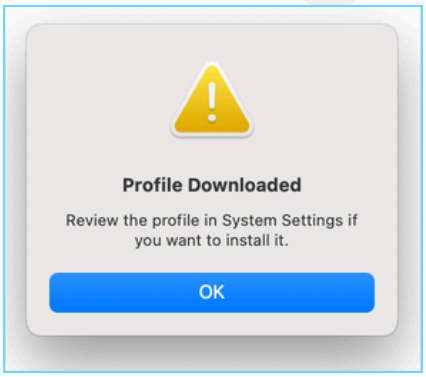

4. Click on the **eduroam®** button.

5. In the pop up, click **Allow**.

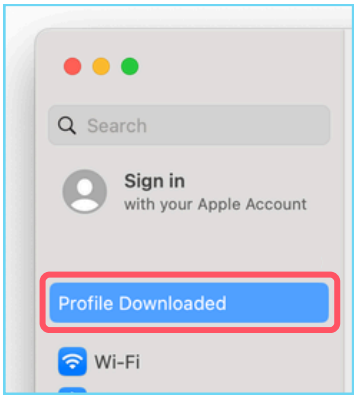

6. In the following pop up, press **Ok**.

7. In your Mac app tray, or via the Apple logo in the top right, open **System Settings**.

8. In the left menu of the settings app, click **Profile Downloaded**.

Connect your Mac to WiFi

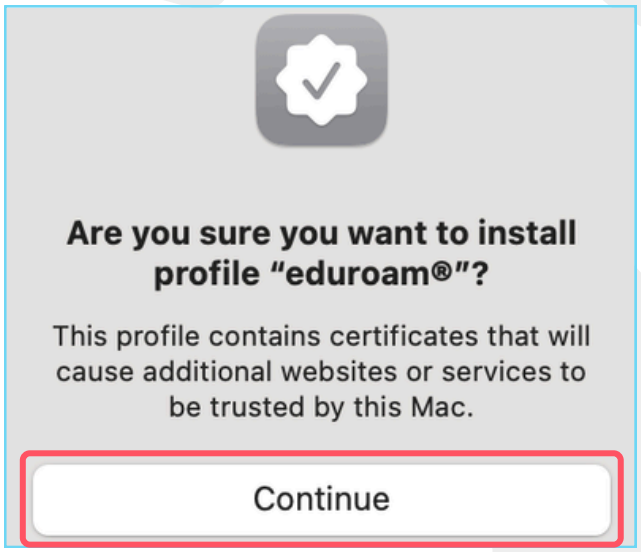

9 In the menu on the right, double-click on **eduroam®**.

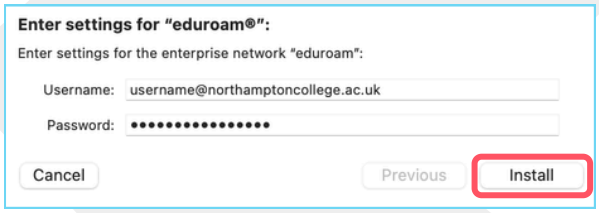

10 In the following screen, click **Install...**

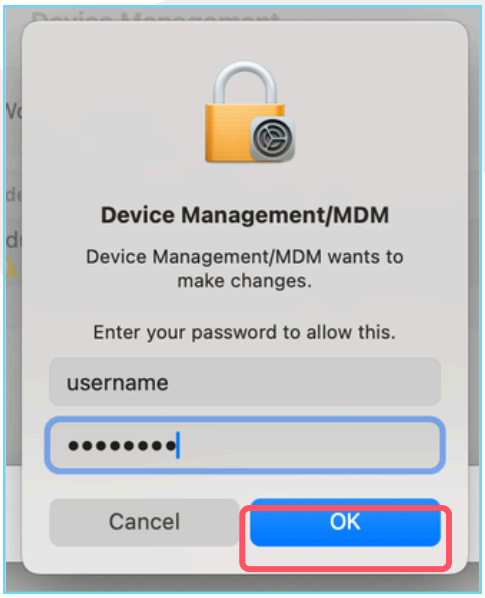

11 In the following pop up press **Continue**.

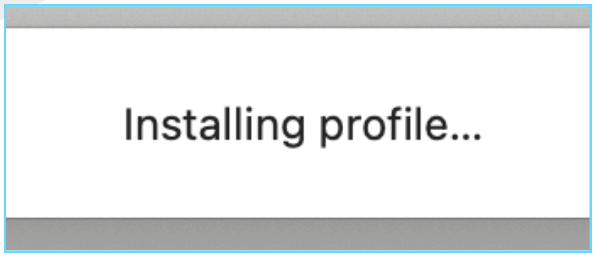

12 In the following screen, enter your full college email and password and click **Install**.

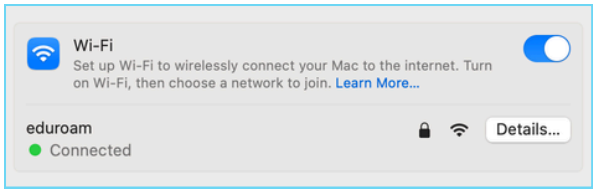

15 If required, enter your Mac sign in in the pop up and click **Ok**.

14 The WiFi will now install and connect.
